

H1 2019 results

JUGOPETROL AD

Podgorica, July 2019

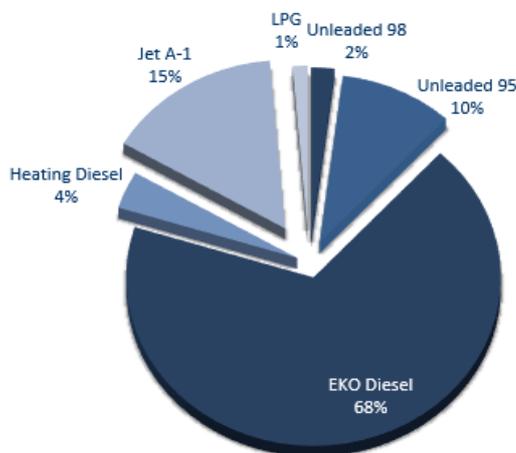

During 2019, Jugopetrol AD continued to realize its strategic vision of being the leading petroleum company in Montenegro.

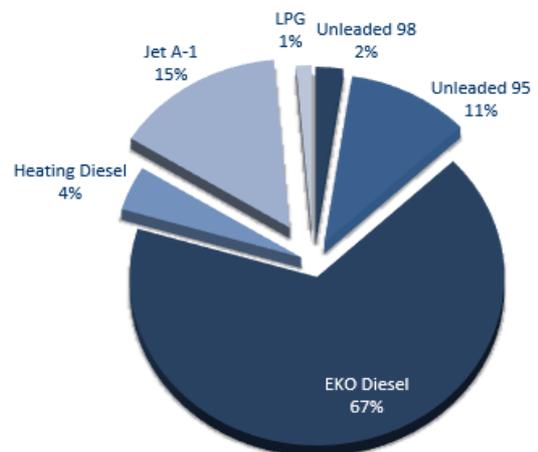

Sales results

Total fuel sales as of the first half of 2019 recorded an increase of 5% compared to the same period last year. Eko diesel continues to be the leading product with 68% of total fuel sales.

Sales per product H1 2019

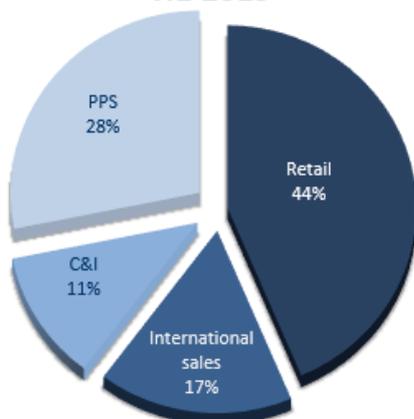

Sales per product H1 2018

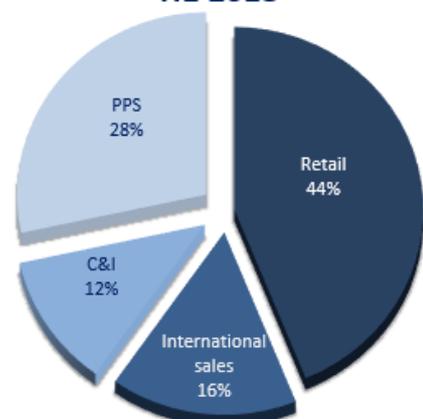

With some small changes in C&I and International sales, volumes split per distribution channel was at the same level as last year:

Sales per distribution channel H1 2019

Sales per distribution channel H1 2018

Retail H1 volumes were +4% higher than last year, mainly as a result of fewer stations closed for reconstruction than during H1 of 2018. Excluding the impact of stations that were closed for reconstruction, the rest of stations performed better than last years, despite growing competition.

The Company is focused on completing the project of reconstruction of its retail network, which will significantly improve the appearance of stations and make the basis for future growth in sales.

International sales (Bunkering & Aviation) continued growth from last year (+9%), driven by higher number of flights in Montenegro and the decisions of some customers to increase the supply of fuel in Montenegro compared to other destinations.

Sales to yachts and other vessels are subject to high seasonality, and off-season sales are erratic and very difficult to predict. During 2019 H1, the Company sold 28% more than in the same period in 2018. Jugopetrol AD continues to be in a position to benefit from the growth of tourism and a higher number of flights expected in the future.

Commercial & Industry (C&I) H1 sales volumes were +2% higher compared to the same period last year. Jugopetrol AD continues to be the first choice for fuel in the C&I segment, with consistency and reliability of supply that characterizes the largest fuel company in the Montenegro market. Knowing the customer needs for many years, Jugopetrol AD can ensure excellent quality of products delivered, the speed of loading and technical excellence of the offered solutions.

Private petrol stations (PPS) sales increased by +4% compared to H1 2018, as a result of increased sales to existing customers and signing of contracts with new customers.

Financial results

Profitability	H1 2019	H1 2018	H1 2017	H1 2016
Net Profit Margin %	0,3%	4,8%	4,4%	4,8%
EBITDA Margin %	2,4%	6,8%	6,7%	7,8%
Gross Profit Margin %	11,6%	16,2%	17,3%	21,1%

The profitability of the Company in Q1 was heavily affected by unfavorable fluctuation of oil prices in the international market. Consecutive decrease in sales prices, defined by the Decree on the establishment of maximum retail prices, which started in December 2018 and further continued in January 2019, was the main reason for a steep drop in the unit margin in all sales segments, which particularly affected Q1 results. From February onwards, a slight recovery of the unit margin was recorded, but this increase was still not high enough to offset low values from the beginning of the year.

In relation to expenses, Company's operating expenses in H1 were by 2% higher compared to last year, mainly driven by an increase in marketing costs, which includes lottery program, donations and sponsorship costs to various associations and organizations.

Cost of depreciation was higher compared to the same period LY because of investment in the retail network but also due to requirements of the new IFRS 16.

Liquidity	H1 2019	H1 2018	H1 2017	H1 2016
Current ratio	2,91	3,24	4,14	4,86
Quick ratio	2,02	1,84	2,41	2,78
Cash ratio	1,14	0,74	0,83	1,23

Liquidity has been constantly at a high level. High values of liquidity ratios mean that the Company was always able to easily meet its short-term liabilities.

Jugopetrol AD has remarkably strong financial position emphasized by its low gearing ratio. The Company does not bear any kind of debt, long or short term.

Transition to IFRS 16

The Company transitioned to IFRS 16 in accordance with the modified retrospective approach. The prior year figures were not adjusted. The Group elected to use the exemptions proposed by the standard on lease contracts for which the lease terms end 12 months as of the date of initial application, and lease contracts for which the underlying asset is of low value.

The following categories of leases were identified and entirely relate to cars, real estate, where as a consequence of the change to IFRS 16 as of 1 January 2019, contracts that previously had been recognized as operating leases, now qualify as leases as defined by the new standard.

During the first-time application of IFRS 16, the right to use the leased asset was generally measured at the amount of lease liability, using the average incremental borrowing rate of 3%. The first time application resulted in recording lease liabilities in the amount of EUR 818.602 and accordingly, right-of-use assets in the amount of EUR 818.602 in the Statement of Financial Position as of 1 January 2019. In addition, prepayments for the lease of the petrol station in Lapcici in amount of EUR 65.982 has been reclassified to right of use asset.

During H1 2019 there was a decrease in lease liabilities (-35K) compared to Q1 this year, and on 30 June 2019 these liabilities amount to EUR 1.129.177, and accordingly, the right of use asset amounts to EUR 1.129.177 in the Statement on Financial Position. Additional advance payment for lease of one petrol station in the amount of EUR 250.000 has been reclassified to the right of use asset in Q1 and the total value of the right of use asset as at 30 June 2019 amounts to EUR 1.379.810.

Operational update

Jugopetrol AD started the project of reconstruction or adaptation of the majority of its petrol stations in 2017, aiming to upgrade the network by the end of 2020. In 2017 and 2018, reconstruction or adaptation works of a total of 10 petrol stations were completed, and the process continued in 2019. During the first six months of 2019, reconstruction of an additional two stations was completed; reconstruction of two more stations has started and is in progress as of June 30th.

Jugopetrol AD is the only oil trade company in Montenegro, whose retail network covers the entire country. To retain its market leading position and further develop its services, the Company is planning to moderately expand its network in the coming years. Following that strategy, a new petrol station in Rozaje, second EKO station in that town, was opened in Q2 2019.

At the end of H1 2019, Jugopetrol AD had 101 employees, which is 4 employees less compared to the same period last year. Jugopetrol AD remains committed to the well-being and development of its employees and continues to invest in their education and training.

As in previous years, Jugopetrol AD is participating in the Government sponsored Internship program. Six trainees have been employed in 2019.

CSR update

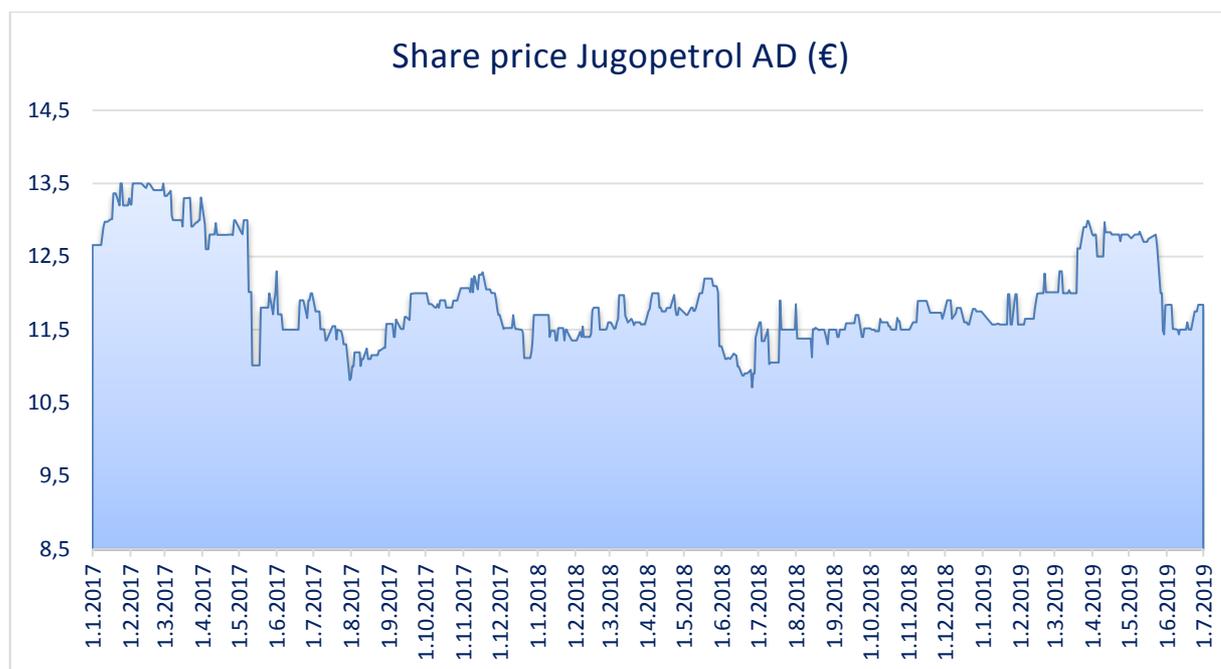

Corporate Social Responsibility is an integral part of Jugopetrol AD culture. The Company continues to invest in its socially responsible activities, aiming at contributing to the development of the society. It has been recognized as a socially responsible citizen, towards its employees, all stakeholders and the public in general.

Activities for 2019 are divided into two pillars: road safety and new generations. During 2019 H1, the campaign 'Stoj da ne bude poslije joj' was organized in cooperation with NGO Pcelica. This campaign is part of the road safety segment and included 27 different activities aimed at education of the youngest on how to behave properly in traffic. The donation of a playground to the Municipality Cetinje and the fourth season of the EKO Mini Volleyball, with the participation of over 650 children, are the activities that were completed in the first half of 2019 and are part of the new generation segment.

Investor update

Jugopetrol's AD stock is one of the most traded stocks in Montenegro. As of Q2 2019 share price fluctuated in the range of 11-13€. The number of shares remained constant.

RISK MANAGEMENT

Main risk factors and mitigating measures

The Company is exposed to a variety of macroeconomic (foreign exchange, oil price), financial (market risk, credit risk, liquidity risk), as well as operational risks. In line with international best practices and within the context of the local market and regulatory framework, the Company's overall risk management policies aim at reducing possible exposure to market volatility and / or mitigating its adverse effects on the financial position of the Company to the extent possible.

The Company's overall risk management program focuses on individual risk areas by addressing each class of risk individually. The main risks faced by the Company, as well as the corresponding mitigating measures are described below:

Main risks	Assesment / Mitigating measures
Macroeconomic environment	
Foreign exchange risk	<ul style="list-style-type: none"> - Functional currency of the Company is EUR and sales and purchases are denominated in EUR, management assessed exposure to foreign currency fluctuations as immaterial - Minor number of transactions in other currencies are converted into EUR on the transaction date
Oil price	<ul style="list-style-type: none"> - The Company has exposure to the risk of commodity prices of oil. Given that State Decree regulates sales prices, any shape change in market prices may have an impact on Company's performance. Company puts efforts on minimizing risk from sudden price changes by keeping level of its stocks in line with expected sales. <p>Overall exposure to price risk is not material for the local market, despite occasional negative impacts, like the one recorded during 2019 Q1.</p>
Financial risks	
Market risk: - Cash flow and fair value interest rate risk	<ul style="list-style-type: none"> - The Company's exposure to market risk for changes in interest rates relates primarily to the Company's short-term deposits included within cash and cash equivalents. Given current market interest rates cash flow risk is assessed as not material.
Credit risk	<ul style="list-style-type: none"> - Differentiation of customers' mix - Faster collection of receivables (DSO reduction) - Review of customers' rating status and limits - Increased collateralisation
Liquidity risk	<ul style="list-style-type: none"> - Maintaining sufficient cash - Improving rate of collection of receivables - Adjusting the amount of dividends paid to shareholders - Phase capex - Monitoring capital on the basis of the gearing ratio. In 2019 the Company did not use any borrowings from the banks
Operational risk	
Safety & Environment	<ul style="list-style-type: none"> - Application of safety processes and regular inspection of all facilities - Investments to improve levels of safety and environmental protection

Compliance in terms of operational and product quality	<ul style="list-style-type: none">- Implementation of necessary measures for full compliance with the existing specifications both on supply chain level and product quality- Investments for adjustment of equipment configuration, in accordance with the local framework
Property and liability risk	<ul style="list-style-type: none">- Insurance coverage for a number of risks, including damage of physical assets, personal injuries, business interruption, product or other liability

Overview of Internal Audit System and Risk Management

In the same context, the Company's Internal Audit System and Risk Management include safeguards and monitoring mechanisms at various levels within the organization, as described below:

Risk Identification, Assessment, Measurement and Management

The identification and assessment of risks take place mainly during the strategic planning and the annual preparation of the business and audit plan. The benefits and opportunities are examined in the context of the company's activities, but also concerning the several and different stakeholders who may be affected.

Planning and Monitoring/ Budget

Company's performance is monitored through a detailed budget per operating sector and market. The budget shall be adjusted systematically and Management monitors the development of the Company's financial performance through regularly issued reports and budget comparisons with the actual results.

Adequacy of the Internal Control System

The Internal Control System consists of the policies, procedures and tasks which have been designed and implemented by the Management Team of the Company and Internal Audit Department for the purpose of the effective management of risks, the achievement of business objectives, the reliability of financial and administrative information and compliance with the laws and regulations.

The Independent Internal Audit Department, through periodic assessments, ensures that the identification procedures and risk management applied by Management are sufficient, that the Internal Control System operates effectively and that information provided to the BoD relative to the Internal Control System, is reliable and of good quality.

Roles and responsibilities of the BoD

The role and responsibilities of the BoD are described in the Internal Procedures Manual of the Company, which is approved by the BoD.

Prevention and Suppression of financial fraud

The areas that are considered to be of high risk for financial fraud are monitored through appropriate internal controls and enhanced security measures. In addition to the internal controls applied by each department, all Company activities are subject to audits from the Internal Audit Department, the results of which are presented to the BoD.

Internal Operating Regulation

The Company has compiled relevant internal regulations approved by the BoD. Within the framework of the Regulations, powers and responsibilities are defined which promote the adequate segregation of duties within the Company.

The Company's Code of Conduct

The Company, in the context of the fundamental obligation of good corporate governance, has drafted and adopted the Code of Conduct, approved by the BoD. The Code of Conduct summarizes the principles according to which any person, employee, any collective body or third party involved in the operation of the Company, should act within the framework of their duties. For this reason, the Code constitutes a practical guide of the day-today tasks of all employees of the Company, but also of third parties who cooperate with it.

Safeguards in Information Technology Systems

The Group's IT Department is responsible for developing the IT strategy, for training of the staff to the new technologies. The IT Department is also responsible for the support of IT systems and applications through the drafting and updating of operation manuals, in cooperation with an external consultant where this is necessary. The Company has developed a sufficient framework to monitor and control its IT systems, which is defined by a set of internal controls, policies and procedures.

Safeguards for Financial Statements and Financial Reporting

The Company applies common policies and monitoring procedures of accounting department which include, amongst others, definitions, accounting principles adopted by the Company, guidelines for the preparation of financial statements and consolidation. Furthermore, it also runs automatic checks and validations between different transactional and reporting systems. In cases of nonrecurring transactions special approval is required. In this regard, the Internal Audit Department performs additional sampling-based checks in the observed period.

Chart of Authorities

A chart of authorities, depicts assigned authorities to various Company executives, to complete certain transactions or actions (e.g. payments, receipts, contracts, etc.).
